## **ENGINEERING CONTROL EVALUATION FOR SAFETY NEEDLES FORM #1**

| Procedure performed with potential risk | Average #<br>performed<br>per year | # of injuries<br>reported per<br>year | Job title(s) of exposed employee | Was the exposure preventable? | How?<br>(use additional space<br>under comments if<br>needed) | Was an engineering/work practice control implemented to prevent/reduce future exposures? | Have injuries occurred since implementing control? |
|---|------------------------------------|---------------------------------------|----------------------------------|-------------------------------|---|--|--|
| Injection                               |                                    |                                       |                                  |                               |   |  |  |
| Phlebotomy using<br>vaccutainer holder  |                                    |                                       |                                  |                               |   |  |  |
| Phlebotomy using syringe                |                                    |                                       |                                  |                               |   |  |  |
| Phlebotomy using butterfly              |                                    |                                       |                                  |                               |   |  |  |
| Finger stick lancet                     |                                    |                                       |                                  |                               |   |  |  |
| Intravenous (IV)                        |                                    |                                       |                                  |                               |   |  |  |
| Suturing                                |                                    |                                       |                                  |                               |   |  |  |
| Scalpel (surgery)                       |                                    |                                       |                                  |                               |   |  |  |
| Other:                                  |                                    |                                       |                                  |                               |   |  |  |
| Other:                                  |                                    |                                       |                                  |                               |   |  |  |
| COMMENTS:                               |                                    |                                       |                                  |                               |   |  |  |
