

JOB EXPOSURE CLASSIFICATION'S BY JOB TITLE

List of job titles of employees; check the job exposure classifications category for each. The OSHA Bloodborne Pathogen Standard requires that job exposure classifications be documented. All classification category 1 and 2 employees will be offered a hepatitis B vaccine and attend an annual bloodborne pathogen safety training program.

[illegible]

Refer to description of each classification found on page 8-3 in the OSHA manual. This chart may be used in place of the individual employee exposure classification form found on page 8-4 in the OSHA manual.
