

SHARPS INJURY LOG

The following log will be kept in addition to the post-exposure management record. The information on this log will be maintained in a way that will protect the confidentiality of the injured employee. This log is helpful to identify safety devices causing and not preventing problems.

How did the incident occur?	Type/Brand of device being used	Work area of incident	Date Post-exposure report was filed	Comments?

Refer to information on establishing a sharps injury log found on page 5321 and 5325 of the January 18, 2001 Federal register containing the final rule for needle sticks and other sharps injuries found in chapter 2 of this manual.
